Cody Rushing

Senior Software Engineer

Austin, TX USA +1 512.736.7313

codyrushing@pm.me linkedin.com/in/crushing github.com/codyrushing crushingviz.info

Results-driven software engineer with 15+ years of experience across early-stage startups, digital agencies, and enterprise SaaS. Full stack generalist with a focus on system design, performance, and scalability. Proven ability to lead teams, collaborate cross-functionally, and own projects from inception to delivery. Human-centered, mission-driven, lifelong learner.

Work history

AidKit *Platform Engineer* January 2024 - present

- Member of the Conversational AI team which delivered a suite of tools including:
  - Automated message drafting to streamline support case management which reduced case duration by 40%.
  - Document classification pipeline with custom document validation and real-time updates.
  - Bespoke prompt management and conversation generation pipeline allowing partners to author, iterate, and test prompts at scale.
- Led the integration of GiveCard bank transfers into the AidKit platform, including realtime updates via webhooks.
- Designed and delivered a privacy-focused video calling solution with end-to-end data ownership using WebRTC and AWS Chime.

Elevation (formerly Curb) *Software Team Lead* July 2016 - December 2023

- Assisted in architecting the Curb cloud system of microservices supporting 10K+ IoT smart meters and 800+ daily active users.
- Built project roadmaps, led engineering initiatives, and mentored junior engineers.
- Designed and implemented internal and public APIs to securely provide historical and real-time energy data using Node.js (Express) and Python (Flask).
- Built UI dashboards for users to monitor their fleets of IoT devices and customers utilizing React and D3.js.
- Developing a demand response system to shift peak demand through automated smart thermostat controls, including a fleet-wide management web portal utilizing Serverless, GraphQL, and Next.js.
- Worked closely with the product team to develop functional product specs and translated those into technical design documents.
- Implemented a timeseries data API for all IoT sensor data utilizing Node.js and AWS Timestream to perform custom binning, aggregations, and interpolation.
- Wrote infrastructure-as-code with AWS CDK to manage the deployment of ECS services, Lambdas, single-page apps, and custom third-party resources.

GreenSync *Software Engineer* October 2015 - March 2016

- Maintained a customer-facing web app providing real-time electricity metering data and interactive visualizations with D3.js.

- Wrote and maintained a suite of automated browser tests.

Atlassian *Web Developer* November 2014 - August 2015

- Developed front-end codebase for atlassian.com and associated web properties.
- Implemented a lightweight jQuery-based component library, custom CMS extensions, and streamlined development and build workflows.

Razorfish *Senior Presentation Layer Engineer* April 2012 - October 2014

- Developed high traffic web applications and CMS-backed websites for clients such as Samsung, Southwest Airlines, BlackBerry, and others.

Monkee-Boy Web Design *Front-End Developer* July 2008 - April 2012

- Client projects consisting mostly of PHP and WordPress-backed websites.
- Translated custom UI designs into mobile-first websites and web applications.

Skills and technologies

TypeScript • **React** • **Node.js** • **Python** • **Go** • **PostgreSQL** • **MongoDB** • **Redis** • **AWS** • **API design** • **Web accessibility** • **Websockets** • **D3.js** • **Cypress** • **Jest** • **OAuth** • **Next.js** • **Tailwind** • **SolidJS** • **Headless CMS** • **Event driven systems** • **Coding agents** • **Three.js** • **OpenAPI** • **Devops**

Education

University of Texas at Austin • B.S. in General Kinesiology (Biology minor)
