Cody Rushing

Senior Full Stack Software Engineer

Austin, TX USA +1 512.736.7313

codyrushing@pm.me linkedin.com/in/crushing github.com/codyrushing crushingviz.info

Solutions-oriented software engineer with 15+ years of experience across startups, digital agencies, and enterprise SaaS. Full stack generalist with a focus on system design, performance, and scalability. Proven ability to lead teams, collaborate cross-functionally, and own projects from inception to delivery. Human-centered, mission-driven, lifelong learner.

Work history

AidKit *Full Stack Software Engineer* January 2024 - present

- Member of the Conversational AI team which delivered a suite of LLM-backed tools including:
  - Automated message drafting to streamline support case management which reduced average case duration by 40%.
  - Document classification pipeline with natural language validation criteria and real-time updates.
  - Bespoke prompt management and conversation generation pipeline allowing partners to author, iterate, and test prompts at scale.
- Led the integration of GiveCard bank transfers into the AidKit platform, which have been used to send 13K+ payments totaling $74M+ to date. Utilizing webhooks to provide real-time payment updates.
- Designed and delivered a privacy-focused video calling solution with end-to-end data ownership using WebRTC and AWS Chime. Used to securely and privately screen 1500+ AidKit recipients.

TypeScript • Node.js • React • PostgreSQL • DynamoDB • AWS • CI/CD • Github Actions • Claude Code • Internationalization • Pulumi • Python • Tailwind • OpenAI SDK • Webhooks

Elevation (formerly Curb) *Software Team Lead* July 2016 - December 2023

- Shipped SaaS product for homeowner and solar fleet operators utilitizing Node.js/Express and Python/Flask REST APIs with React and D3 on the UI. Serving 800+ daily users monitoring 10K+ smart meters.
- Designed and implemented internal and public APIs to securely provide historical and real-time energy data using Node.js (Express) and Python (Flask).
- Implemented a custom Redis-backed cache layer around the public API, reducing average request time by 37%.
- Rewrote the timeseries data API to use AWS Timestream instead of DynamoDB, unlocking custom binning, aggregations, and interpolation while decreasing average latency by 25%.
- Created quarterly project roadmaps, spearheaded engineering initiatives, and mentored junior engineers.
- Worked closely with the product team to develop functional product specs and translated those into technical design documents.
- Developing a demand response system to shift peak demand through automated smart thermostat controls, including a fleet-wide management web portal utilizing Serverless, GraphQL, and Next.js.
- Led development of integration and end-to-end tests, increasing API test coverage from 20% to 100%.
- Wrote infrastructure-as-code with AWS CDK to manage the deployment of ECS services, Lambdas, single-page apps, and custom third-party resources.

TypeScript • Python • Node.js • React • AWS • MongoDB • Redis • API design • OpenAPI • Auth0 • D3.js • Cypress • MQTT • AWS CDK • Docker • Websockets • NextJS • GraphQL

GreenSync *Software Engineer* October 2015 - March 2016

- Maintained a customer-facing web app providing real-time electricity metering data and interactive visualizations with D3.js.
- Wrote and maintained a suite of automated browser tests.

AngularJS • Ruby on Rails • Cucumber

Atlassian *Web Developer* November 2014 - August 2015

- Developed front-end codebase for atlassian.com and associated web properties.
- Implemented a lightweight jQuery-based component library, custom CMS extensions, and streamlined development and build workflows.

Razorfish *Senior Presentation Layer Engineer* April 2012 - October 2014

- Engineered high traffic web applications and CMS-backed websites for enterprise clients such as Samsung, Southwest Airlines, BlackBerry, and others.

Monkee-Boy Web Design *Front-End Developer* July 2008 - April 2012

- Client projects consisting mostly of PHP and WordPress-backed websites.
- Translated custom UI designs into mobile-first websites and web applications.

Skills and technologies

JavaScript/TypeScript • Node.js • React.js • Python • PostgreSQL • Go • MongoDB • Redis • AWS • Docker • DynamoDB • API design • Web accessibility • Internationalization • Websockets • D3.js • Cypress • Jest • OAuth • Next.js • Tailwind • SolidJS • Headless CMS • Event driven systems • AI-assisted engineering • Three.js • OpenAPI • DevOps

Education

University of Texas at Austin • B.S. in General Kinesiology (Biology minor)
